EXPERIENCE

SERSIM/SIMFER GLOBAL

Kayseri

Software Assistant Specialist

Oct 2023 – Present

- Developed web and mobile interfaces for the company's B2B after-sales services, including backend APIs using .NET.
- Built a label design application integrated with SAP, enabling Production and R&D teams to manage labeling efficiently.
- Created two mobile applications for the Quality Assurance team to monitor production lines and manage customer-facing content.
- Implemented a dynamic QR code management system for showcasing products at trade shows.

ERBE YAZILIM

Erciyes Teknopark, Kayseri

Software Engineer Intern

Feb 2021 - Sep 2021

- Developed a .NET desktop application to collect and compile data from existing API endpoints and print invoices via thermal printers using System.Drawing.Graphics methods.

MAM HIGH TECH

Abdullah Gül University, Kayseri

Software Engineer Intern

Jun 2019- Sep 2019

- Developed a Python application using OpenCV and NumPy to label and process images, applying interactive gamma correction, HSV filtering, and cropping for computer vision tasks.
- Maintained and updated the company website using .NET and Blazor (CSHTML), implementing dynamic components and frontend improvements.
